6:45 Business Meeting & Speaker

Systems Architecture

Alan Rosenhauer - Chief Technology Officer, Institute for Intergovernmental Research

Our March program is about how to develop and implement better IT systems for your customers. Our speaker is an acknowledged expert in the field of IT architecture. He is Alan Rosenhauer who is the Chief Technology Officer and Chief Technology Architect & Architecture Group Manager for the Institute for Intergovernmental Research. Alan has over twenty years experience in information systems.

Alan has been with the Institute for Intergovernmental Research (IIR) for eleven years and previously had his own consulting company, TN Systems, LLC in Franklin, TN for eight years. He started his IT career as a Senior Consultant with the Everest Consulting organization here in Nashville.

Alan will discuss the various development methods for systems architecture and the pros and cons for these methods. He will give us real world examples. Alan has transitioned the IIR systems development life cycle (SDLC) from waterfall to Agile, implemented Continuous Delivery, and switched to DevOps model thereby improving software delivery, reducing backlog, and increasing releases threefold. He also reduced office automation costs by moving services to the cloud.

The Institute for Intergovernmental Research (IIR) is a Florida-based nonprofit corporation specializing in criminal justice (law enforcement focus) and Homeland Security issues. IIR has a proven history of promoting greater efficiency and effectiveness among local, state, tribal, and federal criminal justice agencies through customized services. IIR is a highly experienced team of professionals equipped with the knowledge and ability to respond to the needs of justice agencies. They have six Regional Offices. Alan is headquartered in Murfreesboro.

Alan has a Master's degree in MIS and Project Management from Middle Tennessee State University

and a Bachelor's degree in Computer Science from the University of Illinois. He is an award-winning author and a frequent conference speaker.

Alan and his family live on a twenty acre farm outside of Franklin, TN, and maintain many animals. They barter with neighbors with the eggs from their chickens. Alan is also active in the Franklin Christian Academy: a Founding Board member, past Board Chairman, and current Science Fair judge.

Alan Rosenhauer

This should be a "don't miss" program with a knowledgeable and interesting speaker.
