## The Future of Collaboration Jim Bob Howard - SharePoint Developer/Architect/Evangelist

As a SharePoint developer, architect, and evangelist, Jim Bob Howard has seen the rise and fall and rise of SharePoint and its impact on corporate collaboration and communication. Thankfully, SharePoint has matured over the years and is now strategically poised among the cloud solutions that are making businesses more competitive regardless of size. The future of business will see our increasing ability to outsource technology via managed services and cloud solutions. Jim Bob will discuss what that means for the business... and what it means for IT pros.

Jim Bob Howard believes YOU ARE A GENIUS at what you were uniquely created to do. He also believes you should only do what only you can do. Everything else should be delegated or automated. To that end, Jim Bob spends his days making connections... to the right people, the right systems, or both. So you can get back to your zone of genius. He blogs at [www.connectorman.com](http://www.connectorman.com), teaches at [www.unstuckbusinessacademy.com](http://www.unstuckbusinessacademy.com), speaks at [www.jimbobhoward.com](http://www.jimbobhoward.com), and consults on software at [www.journeyteam.com](http://www.journeyteam.com). He is the author of Conventional Wisdom: Making the Most of Trade Shows, Conferences, and Conventions, and co-author of SharePoint 2010 for Work: Tricks, Traps, and Bold Opinions and Unstuck: 10 Proven Strategies for Breaking Through the Barriers to Small Business Growth.

Jim Bob Howard

Jim Bob is well travelled. He spent two weeks with his family on the North Shore of O'ahu. Jim Bob's furthest trip was to a SharePoint users group!! In Nairobi!

Please join us this month for a top-notch presentation.
